Component Name: F-15 structural bulkhead fitting.
Part Designation: BHF-F15-BH-042
Primary Function: Critical load path structural bulkhead fitting on F-15 Eagle military fighter aircraft, transferring combat mar
Materials Composition: ["Titanium 6Al-4V", "stealth-grade RAM-compatible primer", "cadmium plating"]
Mechanical Parameters: Dimensions per MIL-SPEC drawing. Limit load capacity 150,000 lbf at 12G combat maneuver. Mas
Operational Envelope: Temperature range -54C to +71C. High-altitude supersonic operation to 65,000 ft. Combat shock and
Application Interfaces: Bolted to military fighter airframe structures; interface with weapons pylons.
Unique Physical Features: 12G+ limit load certification, combat survivability features, radar cross-section reduction geometr
Intended Platform: F-15 Eagle military fighter (USML Category VIII defense article).
Certification Basis: MIL-STD / military specification; not FAA Part 25 civil certified.
